

Spark Cocktail Table

Miracle Concept is proud to share our latest innovative product named SPARK, and we'll like to introduce its unique features that may suit your coming events.

Spark is a product that is not commonly seen during events. SPARK is a revolving bar table affixed with multi-tiny mirrors on its body and built-in lighting under the table top. Highly differentiated from the usual cocktail tables, the shimmery effect created by the mirrored glowing table will no doubt glam up your events, promising a unique experience to the guests.

SPARK is also designed to be self-powered so as to ease worries on electrical cable planning, making the cocktail area free from cabling works. The set can last for a few hours while running on stored power. Imaging a revolving disco ball as the base of your cocktail table! Takes elegance and cool to the next level!

We are always ready to hear your new unique concept and we will try our best to make it miraculously happened.

**Size : 610mm / 2ft Diameter
1100mm / 3.6ft Height**

**Max Quantity : 25 pcs
Battery life : Up to 4 hours**

MC Stage Platform

We have customised and design our stage based on our past encounters with various locations. We saw the demand for the common sizes and had them built accordingly. The stage is also endorsed by a professional engineer, so it is safe and stable to use!

The speciality of our staging is well-covered by plywood by plywood hoarding in roller paint finished, completed with concealed LED stripe light to enhance the mood and match your event theme. These finishing will give it a more premium and clean and neat finishing.

**Stage Various Height
150mm / 0.5ft (minimum)
300mm / 1ft
450mm / 1.5ft
600mm / 2ft (maximum)**

**Stage Measurement
1220mm / 4ft Length
2440mm / 8ft Depth**

Max Quantity : 40 pcs
